
Commenting on the results, Godwin Emefiele MD/CEO said: “We are pleased to announce our third quarter unaudited results for the financial year 2010 with a sustained improvement in financial performance, operational efficiency, liquidity and capital adequacy. Our strategic focus on offering exceptional customer service and effective branding has seen the Group’s profit before tax (PBT) increase to N39.16bn in Q3’10 representing over 196% increase over the YoY Q3’09 figures of N13.22bn. The above performance is also in line with our focus to return to pre-2009 figures. Our strategic branch network expansion program has continued to yield the desired result of attracting low cost deposits (39% drop in interest expense YoY), and effectively compensating for the reduced interest income earnings from our loan portfolio. We have remained resolute in our drive towards cost effectiveness which saw to a 6.7% drop in overhead expenses year-on-year.

With our large capital and liquidity cushion buoyed by our solid liquid asset balance sheet base, our protection against any adverse events remains intact. The Group’s liquidity and capital adequacy ratios of 59% and 27% respectively are well in excess of the minimum required.”

We will continue to focus on lending to AAA-rated tier 1 customers with low counter party risks as well as ensure that we maintain an appropriate and adequate Risk Management Structure at all times.” said Andy Ojei Executive Director of the division.
Capital and Liquidity

The Group maintained one of the largest Shareholders’ Funds in the country, standing at N356bn as at September 30 2010. The Bank maintains extremely low leverage (capital base predominantly made up of tier 1 capital), coupled with very strong market capitalisation. Capital adequacy and liquidity for the group currently stands at 27% and 59% (Bank - 32% and 55% respectively) well above the CBN statutory minimum of 10% and 25% respectively. Furthermore the bank’s loan to deposit ratio of 59% falls well below the prescribed maximum of 80% at quarter-end.

The Group’s capital is deemed more than adequate to support future expansion as well as cushion against business risks and contingencies.
